GREEN HOUSE

Step into the Green House, a realm of quiet and romantic sophistication - a tapestry of refined and elegant flora and fauna. Here, the Coccinella Bella, Woodblock Beetle, Silk Bombis, Lacy Longlegs and Techno Bee find sanctuary amidst their chosen greenery. Together, they created a wondrous and tactile world. This world is captured in the Green House Wallcovering Collection.

With an air of quiet sophistication and refined elegance, the Green House exudes the ethereal beauty reminiscent of a Victorian conservatory. Discover floral yet abstract patterns in natural colours, offering a sophisticated and tactile experience for your walls. The collection is crafted with high-quality and original materials such as wood veneer, jacquard fabric, bouclé fabric and silk textures. Each wallcovering promising a sensory journey through sophisticated, original designs.

As the sunrays filter through the foliage of the Green House, a botanical spectacle unfolds. Vibrant flowers bloom in kaleidoscopic hues, their fragrances mingling with the earthy aroma of exotic trees and shrubs. The leaves adorned with track marks and other artistic proof of unseen tiny creatures. A testament to the bustling life within this verdant sanctuary. The soft vibrations of bees and ladybugs' wings produce melodious sounds that blend harmoniously with the tactile marvels found within the Green House. It's a living canvas where nature's brushstrokes adorn every petal, every leaf and every creature that calls this enchanting space home.

Greenhouse Gathering

Greenhouse Gathering is a stunning wallcovering that draws inspiration from decorative moulding. The design imitates the sensation of peering through the glass panels of a Green House, uncovering the mesmerising marvels of lush flowers. When examined more closely, intricate features become apparent, highlighting the hidden small creatures moving through a lush green landscape. Infused with the charm of art deco, the Greenhouse Gathering wallcovering comes in a monochrome palette that reminds of plasterwork. The wallcovering has a soft suede look for added tactility.

Greenhouse Gathering is available in 2 designs: Greenhouse Gathering Window and Greenhouse Gathering Arch; each available in 3 colourways.

Techno Bee

Techno Bee is a textile wallcovering with a distinctive moiré effect. The wallcovering comes in two versions; soft gauze textile stretched over a textured relief, revealing the textile's colour through the grid of the gauzy layer; and a stitched version where the motif is embroidered onto a cotton/linen blend fabric.

Techno Bee is available in 3 colourways, Techno Bee Embroidered is available in 1 colourway.

About the Techno Bee

The Techno Bee is known for its soothing lo-fi hum and vibrant wing designs. The rhythmic patterns it creates with its wings, akin to cymatics, are so enchanting that they have a trance-inducing effect on the observer.

The Techno Bee boasts a hexagon pattern on its lower body, accented with golden lines reminiscent of turtle scutes. Metallic, shiny wings and gold-blue fuzz create a sleek yet irresistibly fuzzy appearance.

Notably, the bee lacks a stinger, adding to its captivating allure.

The Techno Bee calls the Striped Orchid home. They are a perfect match as the bee's intricate wing designs blend seamlessly with the mesmerising patterns of the Striped Orchid. This dynamic duo not only looks good together but also helps each other out in the wild. Together they create a natural and mutually beneficial partnership that lures other animals into their vibrating little world.

The Striped Orchids, together with other favoured flowers like the *Diplacus Pictus*, are strategically placed on the eastern side of the Green House. Here, the flowers benefit from strong, dappled morning sunlight.

Silk Bombis

Silk Bombis is a textile wallcovering on non-woven backing. It features abstract floral patterns reminiscent of watercolour-style petals. The design displays the tactile quality of raw silk, presenting a colourful fil-à-fil composition in soft neutral and pastel hues.

Silk Bombis is available in 3 colourways.

About the Silk Bombis

The Silk Bombis skilfully weaves coats of silk jacquards, creating a short, enchanting tapestry on tree branches. Their silk is a canvas dyed with the hues of the flowers they consume, unfolding in a mesmerising watercolour-style weaving.

In terms of physical characteristics, Silk Bombis' boast a cylindrical body with multiple segments, each adorned with small, soft legs. Their skin often features tiny, fine hairs or bristles, enhancing their intriguing appearance. As they navigate their green environment, a delicate tapestry of coloured silk unfolds behind their graceful movements.

The Flowering Mulberry Tree is the preferred plant for Silk Bombis. This old-world plant produces large fragrant flowers in soft pastel colours, reminiscent of silky-soft petals with ragged ends, much like Peonies. Unlike its name suggests, the Flowering Mulberry Tree is actually a shrub and reaches a maximum height of 1.20 m.

Placed on the sunny south side of the Green House, the Flowering Mulberry Tree thrives in its preferred location, contributing to the unique environment for Silk Bombis.

Woodblock Beetle

Woodblock Beetle is a natural wallcovering, showcasing the beauty of handmade wood veneer inlay.

The design is mono coloured and thoughtfully arranged in two directions, creating a subtle mix of shades reminiscent of the classic art of marquetry.

Woodblock Beetle is available in 2 designs: Woodblock Beetle Fern (3 colourways) and Woodblock Beetle Flora (3 colourways).

About the Woodblock Beetle

The Woodblock Beetle is a master of carving enchanting motifs into the bark of trees and shrubs. With razor-sharp legs gracefully dancing across tree trunks, this extraordinary creature turns ordinary wood into living masterpieces.

This rugged artist sports a solid charcoal-coloured body and a striking red thorax. Unlike its six-legged counterparts, the Woodblock Beetle proudly displays eight legs, with the hind legs ending in intricate pinchers. The outer shell wings and thorax feature a dotted pattern, turning this beetle into a walking canvas of natural beauty.

Woodblock Beetles have a distinct preference for the Crape Myrtle and dwarf fruit trees. Presumably, the bark of fruit-bearing shrubs, especially cherry and prune trees, holds a sweetness that captivates them. The reason behind their fondness for Crape Myrtle trees remains a mystery. Despite their relatively small size, these chosen trees are strategically placed throughout the Green House to catch enough light amid the smaller plants and flowers scattered around.

Lacy Longlegs

Lacy Longlegs is a 3D textile wallcovering. This tactile wallcovering creates a soft, three-dimensional effect courtesy of the bouclé fabric. The design takes inspiration from the spider's intricate weaves, preferred leaves and Gothic arches.

Lacy Longlegs is available in 4 colourways.

About the Lacy Longlegs

The Lacy Longlegs constructs her exquisite architectural weavings with mathematical beauty and perfection. For the onlooker, the animal may seem like a tangled mess, but this arachnid is a master of organised chaos. The finished webbings are not unlike the filigree-type of patterns found in gothic architecture. Legs for days and webbing everywhere, that's the best way to describe this genius creature. Sometimes it is hard to see where the webbing ends and the spiders begins. Rarely spiders are perceived as nice-looking, but Lacy Longlegs captivates any onlooker that can glimpse the animal through the webbing, with her glistening gold limbs that look like delicate needles. Lacy Longlegs prefer leafy plants that provide lots of surface for them to work on. The bigger the leaves, the better. The Monstera Deliciosa is their favourite because the holes in the leaves provides an extra layer of beauty to their artistic weavings. Other plants that provide interesting structures for the spider to work with are Ostrich Ferns and Alocasias. The Monstera Deliciosa prefers sunlight and can be found on the eastern-, southern and western facing side of the Green House. The Ostrich Ferns and Alocasias prefer the shade and are mostly near the northern-facing windows.

Coccinella Bella

Coccinella Bella is inspired by the wide range of flowers and leaves that Coccinella Bellas call home, the motif features a Jacobean-like floral pattern. The motif comes in two variants: a detailed multi-colour variant printed on a soft touch textile and a two-toned jacquard textile variant.

Coccinella Bella is available in 2 colourways, Coccinella Bella Jacquard is available in 1 colourway.

About the Coccinella Bella

Coccinella Bellas emerge from hidden habitats only during the full moon when their favourite stripy leaves and poppy-like flowers bask in a silver glow.

These beautiful tiny ladybugs display contrasting colours and unique patterns, resembling stars in the night sky. Some sport delicate, perfectly round celestial-patterned dots scattered across their wings, while others boast elegant stripes flowing like rivers. The rare among them exhibit elaborate patterns resembling floral tapestries.

Coccinella Bellas aren't fussy; they adore anything floral and scatter around. Only on and around poppies do they flock in groups. When seeking solitude, they gracefully fly to other plants and flowers, preferably those with similar patterns to blend in.

Poppies, with their large fragrant flowers, thrive in full sun and so do most Coccinella Bellas. Therefore, the sunny south side of the Green House becomes a bustling hub for these enchanting creatures, as they flit from flower to flower, adding a touch of celestial magic to the vibrant scene.
